

THE CORPORATE PATENT *Scorecard*

IFI Patent Intelligence, a Wolters Kluwer Health business, announced its annual compilation of the world's top-ranked U.S. patent winners. According to IFI's analysis, 2006 was a banner year for corporate patents with 173,772 issued—an all-time U.S. Patent and Trademark Office (USPTO) record and a hefty 20.8 percent increase compared to 2005. This increase comes on the heels of two years in a row of patent-grant decreases and appears to negate the position that intellectual property activity is on a downswing.

IBM Corp. holds the top slot this year, as it has for 14 years running, with a record 3,651 patents. **Samsung** enters the top three for the first time at the number 2 position followed by **Canon** at number 3, **Matsushita** at number 4, and **HP** at number 5, all of which exceeded the 2,000 mark and had their biggest issue years ever. In the past 5 years, no organization other than IBM has ever broken the 2,000 barrier.

Japan-based organizations lead the U.S. patent-assignee list with 9 of the top 20 slots (U.S.-based organizations hold only 7 spots on that same list). Although electronics dominates the top 25 list, other sectors are also showing growth. For example, the total number of pharmaceutical-related patents granted in 2006 increased approximately 22 percent over 2005. Additionally, biotech patents grew roughly 29 percent over the previous year.

IFI compiles its listing from original USPTO data using the powerful indexing and standardization algorithms of CLAIMS®, the most reliable, text-searchable database of U.S. patents in the world. The collection of CLAIMS® databases makes searching for patent data accurate and efficient. CLAIMS® is available via Thomson Dialog, STN International and Questel. For ordering information, contact IFI at 800-331-4955 or visit www.ificlaims.com.

Why Are You Losing Inventors To Your Competition?

If you believe good pay and benefits are what keep inventors with your company, you might be surprised by the TRUTH.

"The number one reason people give for leaving a company is lack of praise and recognition."

Staffing Company Robert Half International as reported in *Quality Digest*.

Recognition is important and valuable to your company's success. Patent Awards has answers to your recognition questions. Once you decide recognition is right for you, we make it easy – all you need to provide are names, we can research patent numbers and always provide you with patent text and art.

To explore how to develop or improve Inventor Recognition, contact Patent Awards at 800.319.2899.
